

ATTENTION!

Dr. Hamer is deeply concerned about the ongoing plagiarism and corruption of his discoveries. He therefore wants to inform the public, and particularly those seeking medical support based on GNM, that there is no association of any kind between German New Medicine® and those groups and individuals listed below.

Dr. Hamer alerts the public to be on guard concerning the irresponsible misuse of his work, especially with regards to the unqualified analysis of brain scans.

TOTAL BIOLOGY is an organization founded in 1985 by **Dr. Claude Sabbah**, a French medical doctor. As early as 1993, Dr. Sabbah was ready to take over Dr. Hamer's "New Medicine" under the name of "La Biologie Totale" (Total Biology). To this day, followers of Dr. Sabbah, notably **G rard Athias**, **Olivier Soulier** and offshoots such as ...

BIOLOGICAL DE-PROGRAMMING - BIOGENEALOGY
(**Christian Fleche**, **Patrick Obissier**)

BIODECODING® (**Anne-Marie Boularand**)
AWARENESS HEALING (**Dr. Nelie Johnson**)
QUANTUM UNIVERSITY (**Dr. Paul Drouin**)

... continue to plagiarize and misrepresent Dr. Hamer's original discoveries. Their literature as well as their teaching reveals a serious lack of a basic understanding of German New Medicine, particularly with regards to the practical application of GNM. The same applies to...

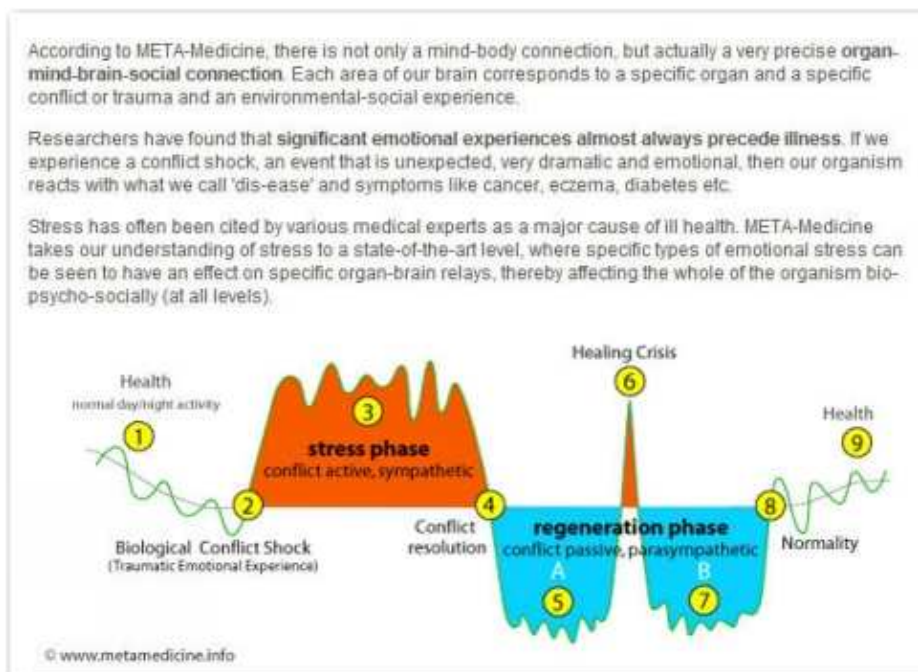

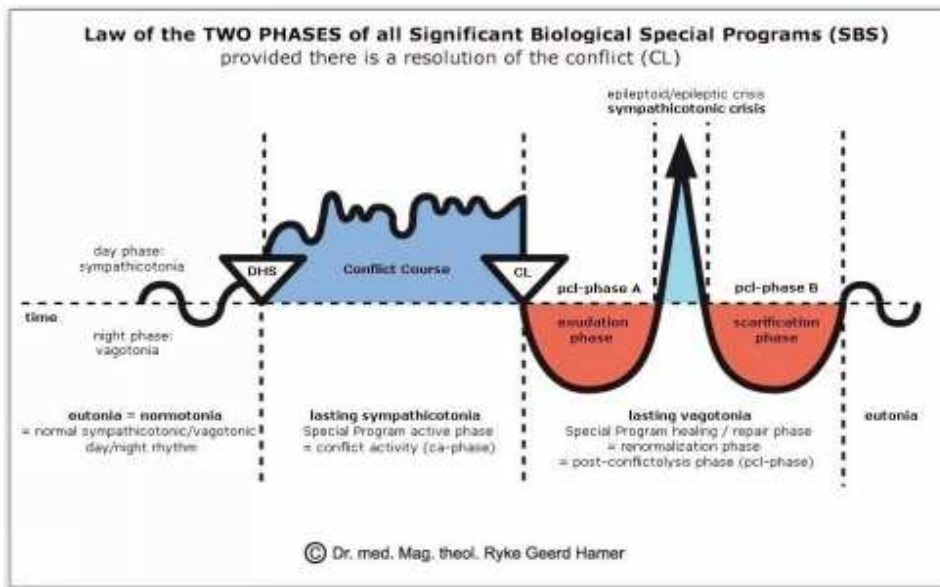

RECALL HEALING ((**Gilbert Renaud**, **Dr. Pieter DeWet**, **Dr. David Holt, D.O.**) propagated by **Dr. Mercola** as a "revision(!)" of German New Medicine in the U.S.A."

Dr. DAVID HOLT, D.O. HMD (Integrative Medical Center, Nevada) **falsely presents himself as "the leading U.S. physician in German New Medicine"**.

In Dr. Holt's video-interview, entitled "German New Medicine. Creating a Heart Attack - An Animal Study", a "territorial loss conflict" is intentionally inflicted on a healthy dog. When, six weeks later, the experimenters returned the animal to his territory, the dog had a fatal heart attack (commented by Dr. Mercola and Dr. Holt with laughter). With this **disgraceful film**, Dr. Holt is trying to verify Dr. Hamer's findings on the cause of heart attacks. In this video, Dr. Holt is giving the entirely wrong impression that Dr. Hamer and German New Medicine is involved in animal experimentation. **Dr. Hamer strongly opposes testing on animals**. Dr. Hamer: "today's animal testing is nothing but cruelty, ignoring that animals have a soul. Therefore, I allow myself the following prediction: one day, all animal experimentation will be exposed as a disgrace for our whole society and will be seen as a testimony to our unspeakable lack of knowledge and sensitivity." Click [here](#) to read more...

META-Medicine® is plagiarizing Dr. Hamer's medical research on a large scale. In 2004, **Johannes Fisslinger** (Los Angeles, CA), founder of the IMMA (Intl. Meta Medicine Association) callously took over and *renamed* Dr. Hamer's medical discoveries, for which Dr. Hamer has been persecuted for almost 30 years! **Richard Flook** acts as the international head trainer of this fraudulent organization.

META-Medicine has removed all traces that would lead to Dr. Hamer or his son Dirk. A **DHS** (Dirk Hamer Syndrome) has been renamed to a SEE (Significant Emotional Experience") – see also NLP and NES below.

Note the © and the blatant copyright infringement

We are surprised that someone like **Dr. Bruce Lipton** ("Biology of Belief"), who calls himself a "spiritual scientist", wants to be associated with fraud and deceit by serving on the Advisory Board of the International META-Medicine Association.

EPFX/SCIO, was developed by William Nelsen. The device is based on a random event generator that tests a large database of items, including "Hamer Herd facilities"! This alleged "Cancer Scan" matches the data of the disturbed brain area with other stored information. Because of the large number of parameters involved, the results are rather unpredictable. Needless to say that Dr. Hamer is shocked that his name has been used, once again, for a "medicine" that includes an irresponsible misrepresentation of his research.

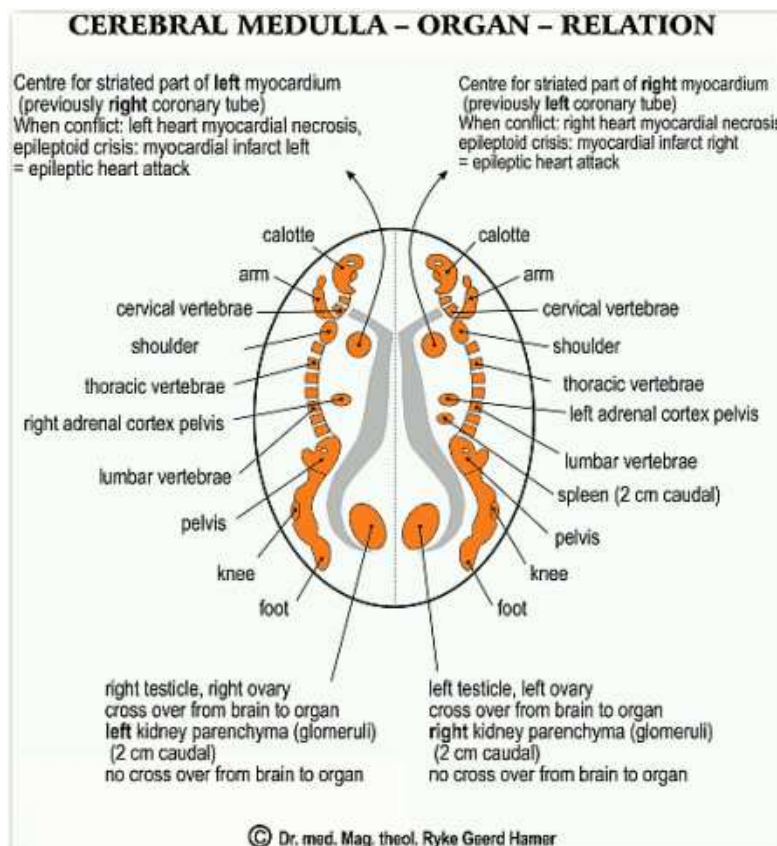

NLP (Neuro-Linguistics Programming) is using Dr. Hamer's findings in their Time Line Therapy™ Techniques and Time Empowerment™ Techniques without giving credit to Dr. Hamer, as the originator of GNM, or any reference to Dr. Hamer's research material.

From Recent Trauma:

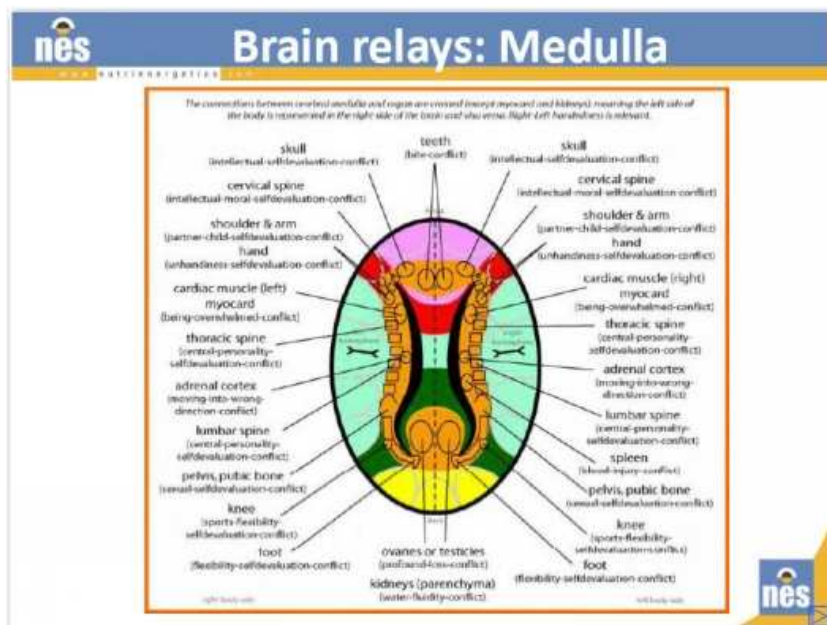

Current thinking is that it is not the childhood trauma that causes the cancer, it is a more recent trauma. It is also important to understand that it is the first event that allows the more recent SEE to create a lesion in the brain. One procedure in addition to Medical treatment is to release the SEE using what seem to be traditional psychological methods. But, doing this, even an imagined SEE is sufficient to bring back a relapse of the cancer symptoms. Our experience with Time Line Therapy™, however, is that the recurrence of the cancer can be prevented if the emotion on the first event is also released.

NLP and META-Medicine are now collaborating in the fraudulent take-over of German New Medicine® - see NLP website.

NES (Nutri-Energetics System®), devised by **Peter Fraser (UK)** has also **teamed up with META-Medicine® and NLP** in the hijacking of Dr. Hamer's discoveries. This is what plagiarism looks like:

Dr. Hamer's ORIGINAL DIAGRAM

NES PLAGIARIZED DIAGRAM

Dr. JOHN TURNER, D.C. (Atlanta, GA) who has been using Dr. Hamer's medical discoveries for the promotion of his "EON Therapy Certification Program", is now marketing his "research" under the name "**Quantum Neurological Reset Therapy**" (QNRT). - **Dr. Hamer asked us to inform the public that Dr. Turner's "Therapy" is in no way affiliated with German New Medicine.**

Based on the two-phase pattern of all "diseases", the resolution ("clearing") of an emotional traumatic experience can cause the onset of healing symptoms with potentially serious complications, particularly during the Epileptoid Crisis. Since the psyche, the brain, and the related organ always work in unison, it is, according to Dr. Hamer, of the utmost importance to "downgrade" an intense conflict before its complete resolution. Under certain circumstances, it is even imperative **NOT** to resolve a conflict in order to prevent a difficult healing crisis. **Most noticeable symptoms**, such as swelling, pain, inflammation, fever, discharge as well as certain cancers, are signs that the **organism is already undergoing a natural healing process**, indicating that the **related conflict has already been resolved** ("cleared")!
